why does the united states promote democracy how successful has it been and why do critics often attack it for doing so these are at least three of the questions examined in this wide ranging discussion of american efforts to recast the international order in its own political image the answers provided by a distinguished group of analysts are as diverse as they are challenging to traditional ways of thinking about us democracy promotion in terms of either a misconstrued moralism or an ideological facade masking some deeper more sinister purpose as we enter into the twenty first century with american hegemony intact it is vital to understand what drives the world s last remaining superpower and this original study helps us do precisely that by exploring in detail and depth one of the more contentious least analysed and most misunderstood aspects of american foreign policy

politics in cuba have long been analysed as a socialist experiment from the perspective of internal dynamics or international relations but what if the revolutionary process is part of a counter current against neoliberal globalisation rather than presenting cuba as a socialist survivor whose performance must be measured against the standards set by the international community george lambie judges cuban socialism on the goals that the revolution sets for itself he shows that despite cuba s isolation in the new world order and the enormous pressures it has faced to conform its faith in an alternative socialist project has continued and grown after the 2008 financial crash we have seen neoliberalism s fallibility first hand conversely cuba s promotion of socialist values has a renewed relevance lambie argues that cuba is again becoming a symbol and practical example of socialism in action

in this book sociologist william robinson offers a theory of globalization that follows the rise of a new capitalist class and a new type of state formation he explains how global capital mobility has allowed capital to reorganize production worldwide in accordance with a whole range of considerations that allow for maximizing profit making opportunities this worldwide decentralization and fragmentation of the production process has taken place alongside the centralization of command and control of the global economy in transnational capital in turn this economic reorganization finds a political counterpart in the rise of the transnational state in the future robinson argues hegemony will be exercised not by a particular nation state but by the new global ruling class who regardless of their nationality tend to share similar lifestyles and interact through expanding networks of this transnational state in this way the process of globalization is unifying the world into a single mode of production that is increasingly integrating different countries and regions into a new global economy and society robinson concludes that because the new global capitalism is rife wit
