wireless communication is one of the most dynamic and vibrant areas of technology development in the communication field today it has been found that severe climatic conditions disturb the propagation of electromagnetic signals at higher frequencies greater than 30 mhz the disturbance is mainly due to molecular absorption by oxygen for frequencies ranging between 60 and 118 ghz and due to water vapour in 22 183 and 325 ghz bands rain and fog has the most significant impact since the size of the rain drops is of the order of the wavelength of the transmitted signal this results in energy absorption by the rain drops themselves and as a secondary effect energy is scattered by the drops the frequency selective absorption characteristics of the atmosphere can be approximated by a transfer function in most of the practical channels when the signal propagates through the atmosphere the effect of many factors on the signal has to be considered along with

the free space propagation channel assumption the main objective of this study is therefore to find out whether and how the different climatic conditions are influencing radio wave propagation in gsm frequency bands in general and in narnaul haryana india in particular to carry out this investigation the records of radio wave propagation along with path loss during different climatic conditions have been analyzed on the strength of these analyses a propagation path loss model has been developed by proposing suitable correction factors due to different climatic conditions the validation of this developed path loss model has been verified by taking reference models and by applying practically in different urban areas the effect of these climatic conditions on the link budget has also been analyzed

are you ready to plan your best lessons ever with so many demands and so much content available for teachers we need to put a higher value on an often overlooked skill planning learning experiences that will both engage and inspire our students by design over time planning powerful instruction is your go to guide for transforming student outcomes through stellar instructional planning its seven step framework the empower model gives you techniques proven to help students develop true insight and understanding you ll have at your fingertips the real reasons why students engage and what you must do to ensure they do a framework to help you create plan and teach the most effective units and lessons in any subject area more than 50 actionable strategies to incorporate right away suggestions for tailoring units for a wide range of learners downloadable ready to go tools for planning and teaching whether you are a classroom teacher an instructional leader or a pre service teacher planning powerful instruction will forever change the way you think about how you teach and the unique value you bring to your learners

this book gathers selected original papers presented at the sixth beijing normal university university college london institute of education international conference in education a biennial event organised in partnership between this two universities readers will find a wealth of papers and reports on research involving schools and the initial and professional development of teachers revealing links between research policy and practice while also analyzing key themes in education including public goals and policies pedagogy curricula organisation resources and technologies and institutional effectiveness an essential guide for anyone who wishes to understand the main issues involved in mobilities of ideas people and technology in the field of education the book offers an extensive introduction and can also be used as a resource for empirical and conceptual research into related issues

abstract in this study i propose a strong and innovative model of teaching that centers on the student and i report on the efficacy of this model using quantitative research procedures this model of teaching is systematized in the marhaba curriculum a method of teaching first year high school arabic that i designed tested and evaluated the marhaba curriculum is founded on best practices and is a natural outgrowth of contemporary education theories including non linear curriculum design and multiple modality teaching materials that take into consideration students diverse learning styles analysis of data indicates that use of the marhaba curriculum positively influences student proficiency in arabic in particular students become proficient regardless of a student s

gender grade socioeconomic status or parent educational background also student proficiency is not dependent on a student's attitude to learning or engagement in class or a student's attitude toward the curriculum

this book covers the new edpm csec syllabus to be taught from september 2011 it introduces computing fundamentals electronic communication and keyboarding techniques before teaching the microsoft office 2003 2010 skills required by the course next students are shown several aspects of document preparation complete with sample documents after covering document management and ethics it gives sba tips and exam papers with answers included on the cd exercises and summaries are found at the end of each chapter the accompanying cd rom is packed with material including interactive revision questions powerpoint presentations tutorial videos exercise files and a comprehensive glossary

this classroom tested book disk learning system provides a fast introduction to this powerful windows based graphical spreadsheet program the disk component of this unique learning system contains every example that is referred to in the text the reader calls up files from the disk and interacts with the software at each step of the learning process

coasters etc is a beginning level integrated application simulation this simulation integrates administrative written communication and technological skills required to take the user into the 21st century working in the marketing department at the amusement park coasters etc students work with internet e mail electronic scheduling presentation graphics and other computerized activities utilizing word processing spreadsheet database and desktop publishing software
